Kit 412 - ResQmax Swift Water / Messenger Line Kit

Description:

The ResQmax Kit 412 is the Swift Water / Messenger Line Kit supplied with two payloads and all the accessories required to operate your ResQmax. The Dacron Line is a messenger line which allows for long range horizontal deployment distances of 400ft / 104m. This line can be used to tow larger, stronger ropes across a river or other fast moving body of water. The Polyspectra Line has a stronger test strength of 2200 lbs / 998 kg and is intended to be used in water-based operations which require the line to float. This line, when coupled with the Sling Projectile becomes an effective way to assist a distressed swimmer who may be caught in strong currents by delivering the ResQmax Sling with in seconds. The Auto-inflating Sling has a mechanism which inflates the sling on contact with water. The deployment distance of the Polyspectra Line with the Standard Projectile is about 275ft / 84m. The ResQmax Streamline Filler Hose facilitates charging the Projectiles with compressed air from an Air Compressor, a SCUBA Tank, or a SCUBA Tank. The service pressure of these Projectiles is 3,000psi / 207 BAR. This kit comes complete with spares and a Kit Carry Bag for easy carrying. Optional accessories include the ResQmax Tool Kit and a Rigid Transport/Storage Case. Additional projectiles and lines are available with all of the ResQmax Kits.
